

MEDICAL SYSTEMS IT WORKING AS A BUSINESS ENABLER MAQUET – THE GOLD STANDARD

SURGICAL WORKPLACES

The IT of the global market leader for medical technology MAQUET acts as a full service provider for MAQUET worldwide. We provide services of different scalability to meet business needs and opportunities.

MAQUET represents the business area Medical Systems and forms, along with ArjoHuntleigh Extended Care and GETINGE Infection Control, the publicly listed Swedish GETINGE GROUP, which ranks among the top 25 medical companies worldwide. The integrated products of MAQUET are specially designed to deliver optimal clinical treatment and therapeutic applications within acute care hospitals, focusing on the Operating Room (OR) and Intensive Care Unit (ICU).

The GETINGE GROUP is a company with around 2.2 billion euros in revenues (2009 fiscal year) and 12,100 employees worldwide. In 2009 MAQUET itself generated revenues of around 1.1 billion euros. The company now has more than 5,000 employees in 36 international sales and service organizations, as well as a network of more than 250 sales representatives. 12 manufacturing sites are located in 6 countries.

The last projects of MAQUET demonstrated the dependency of the IT on external consultants and service providers. Keeping this in mind, Medical Systems IT is facing the challenges ahead by reinforcing the internal IT competencies with the goal to become the business enabler within the GETINGE GROUP.

OUR STANDARD SERVICES CAN BE CATEGORIZED

Business Application Services: Business applications are applications that support MAQUET's key business processes. Medical Systems IT supports and/or hosts these business applications and increases effectiveness and efficiency through automation of business processes.

- ERP – SAP
- CRM – Siebel
- BI & Planning – Cognos
- EAI – SAP XI / PI

Projects Including Project Management: Medical Systems IT helps the users to execute and finish projects by allocating skilled IT personnel to develop IT solutions for your business processes. We completely manage the technical part of their projects. Furthermore we provide experienced project managers in order to meet their project goals on time and in budget.

Process Consultants: Medical Systems IT helps the users to automate their business processes and gives them new ideas for improving their processes. We support the integration of their business processes into the existing IT environment and consolidation of their data. We use modern visualization and process mapping technology to fully explore and analyze the technological impact on work content, processes and various internal and external collaborating interfaces.

Personnel development and recruitment: To advance the GETINGE GROUP's operations at fast pace, the Group must be able to recruit, develop and retain qualified employees. Our leadership programme encompasses basic management training, training courses, geared towards experienced managers and senior project managers, and five customised training programmes that the Group launched in partnership with the Copenhagen Business School and the University of Glasgow for advanced studies in various professional and subject areas.

Multicultural elements play a key role in several of the training programmes and also constitute an increasingly important function since the GETINGE GROUP as a company is represented in a large and growing number of countries. The training programs ensure that the Group is up-to-date and well informed regarding the use of the latest and best-developed methods for management/optimisation of production processes or market analyses. The programme also increases the awareness of the benefits of lifelong learning. The analysis and evaluation of new employees is not just to assess their actual knowledge and experiences, but it is also meant to ensure that the individual's values correspond to those of the GETINGE GROUP. The most experienced and theoretically knowledgeable individual is not always best for the company if the individual in question does not value and support the GETINGE GROUP's culture, such as the Group's business ethics.

LOCATION AND SOCIAL ENVIRONMENT

The MAQUET headquarter with about 1.000 employees is located in Rastatt in the Baden region and the areas second largest employer, superseded only by Mercedes. Consistently the Rastatt district leads in nationwide rankings concerning economic power and quality of life. "Living and working in a holiday region" is more than a strapline to the district in the Baden region.

An interesting landscape rich in contrast, charming villages, prosperous towns, well-known commercial enterprises and a unique agriculture mold the affluent region between the Black Forest, Rhine and vine, where natives and guests are as comfortable.

A very pretty rural character with one of the strongest industrial locations in Germany being embedded is no contradiction here. Rastatt is as well situated on the European north-south-development axis as on the magistrale from Paris-over Strasbourg-Karlsruhe-Munich- to Vienna in immediate vicinity to the French border. The international passenger and cargo airport Karlsruhe/Baden-Baden (Baden Airpark) has an enormous importance not only to the Rastatt district. The whole

technology-region Karlsruhe provides excellent education and research facilities like e.g. the elite University of Karlsruhe.

Because of the high quality of life in the southwest of Germany relocation to the Rastatt district or nearby is a decision a family will never regret. MAQUET supports the integration of new employees on-site in many ways.

Rastatt is a bon vivant district with first class cuisine, excellent domestic vines and tasty regional products. Furthermore the region is recognized for cultural highlights like theater and music events at Germany's biggest open air theater in Ötigheim or the equestrian sport events at the world-famous racecourse Iffezheim. And certainly the district benefits from the top-tier cultural events and entertainment in Baden-Baden.

500 kilometers of pedestrian walkways, 1.000 kilometers bicycle path, winter sports, swimming lakes with premium water quality, wellness and all kind of sport establishments as well as historical landmarks like the Baroque residential palace Rastatt or the Eberstein palace in Gernsbach are attractive leisure facilities.
